Summary

Software Engineer specializing in backend systems, AI workflows, automation, and cross-platform applications.

Skills

Python, JavaScript, TypeScript, Dart, SQL, NestJS, Next.js, React, Flutter, Django, MySQL, PostgreSQL, Firebase, Docker, Git, Linux, FFmpeg, MCP, Obsidian

Experience

Software Engineer | Softray Technologies | 2026–Present

- Architected multi-agent AI workflows for autonomous software development.
- Built shared contextual memory with Obsidian and MCP.
- Reduced AI-assisted development time by up to 80%.

Backend Developer | Softray Technologies | 2025

- Engineered secure backend services for a financial platform.
- Led migration from Firebase to a scalable backend architecture.
- Implemented authentication, encryption, and high-performance APIs.

Software Engineer | QuickPost | 2024

- Built a real-time social platform for web and mobile.
- Implemented feeds, authentication, and media sharing.
- Designed reusable UI systems and scalable architecture.

Python Developer | Media Automation Tools | 2024

- Developed high-performance media processing APIs.
- Automated FFmpeg production workflows.
- Built reusable command-line automation tools.

Education

B.Sc. Telecommunication Science

University of Ilorin (2024)
